Introduction We cannot predict the future

– If a parent carries 2 different alleles for a certain gene, there is no way to be sure

which allele will be inherited by its offspring

The only thing we can do is predict the odds by applying Mendel ' s principles

~~Chapter 11: Introduction to Genetics~~

Genetics and Probability. Probability. is the likelihood that an event will occur. Scientists use probability to predict the outcomes of genetic crosses. If a coin is flipped once, the chance that it will be heads is $1/2$. If it is flipped three times in a row, the probability of flipping all heads is? $1/2 \times 1/2 \times 1/2 =$
