Farm is George Orwell's satire on the Russian Revolution of 1917 and Stalin's subsequent rule. It tells the story of the animals of Manor Farm, as they rise up against the drunken farmer Mr Jones and the ensuing leadership battle between two pigs, Snowball and Napoleon. They set in motion their 'system of thought', Animalism, a clear play on Communism, with seven tenets including, 'All animals are equal but some animals are more equal than others.'

The Bohensky Dissection Series has been used successfully by more than 300,000 biology students nationwide. Each book in the series is designed to guide the student through the study of anatomical structures. The books do this through the use of clearly marked photographs and illustrations. Accompanying text offers the student both easy-to-follow dissection instructions and factual information about the section under observation. At the end of each chapter there are tests which can be used for self-study or for grade course evaluation. Within the traditional dissection portion of a biology course, many programs include the sheep heart, eye, and brain. Within many of these guides, the author has incorporated photographs of these structures to more closely follow standard

course curriculum. The author also provides important information on human organs such as the eye, ear, and heart. In this way, the student can better understand the role and function of these organs as they relate to human life processes. Add to this each book's large-size format, lay-flat spiral binding, and reasonable cost, and you can see why the Bohensky Dissection Series has become one of the most successful dissection guides used throughout this country's schools.
