Milestones in Automation The evolution of automation is closely tied to the development of electronics and microelectronics. It began 50 years ago with pure hardware solutions, wired circuits and control systems. This was followed by the period of software orientation and programming, which in the last decade, the era of communication and information, finally led to the concept of Totally integrated Automation. If the mark left by development at the beginning was due to the implementation of what was technically feasible, today it is the opinion of the user that is the decisive factor. "What functions and interfaces must programmable controllers offer in order to fulfill the demands of multi-networked technical applications of widely varied complexity?" The story told in this book therefore extends from the beginning of Simatic, the

Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book.

state theorists Ralph Miliband and Nicos Poulantzas. We have recently lived through the turmoil of a global financial crisis that originated in the United States and, despite the platitudes of neo-liberal ideology, nation-states were deeply involved in managing this crisis. If "the state" is again a preeminent actor in the global economy, then state theory and the problem of the state should also return to the forefront of political theory. *Toward a Critical Theory of States* is an intensive analysis of the 1970s debate between state theorists Ralph Miliband and Nicos Poulantzas, including its wider impact on Marxist theories of the state in subsequent decades.

Clyde W. Barrow makes unique arguments and contributions to this continuing discussion in state theory and lays the foundation for more theoretically informed empirical and historical research on the state in the age of globalization. He argues that by merely moving

past the Poulantzas-Miliband debate, as some have recommended, scholars have abandoned much that is valuable in understanding the state, particularly the need to comprehend the contemporary transformation of the state form and the state apparatuses as part of the new conditions of globalization and transnational capital accumulation. Building upon themes of state restructuring found in Poulantzas and Miliband, Barrow establishes the outlines of an approach that integrates the thought of both to propose a synthetic understanding of the new imperialism.
