1952-54 include world-wide radio who's who.

World Radio TV Handbook continues to be the guide for the serious radio listener. In this, the 57th edition for the year 2003, we have again devoted our resources to the all-important task of obtaining and providing the most up-to-date information on medium wave and shortwave broadcasts and broadcasters available in any publication. Articles on many different topics of great interest to listeners and dxers alike. - Features - Colour pages giving articles, radio reviews, propagation predictions, and colour maps - National Radio - The world's national radio services together with MW frequency lists by region - International Radio - The winter shortwave frequencies as supplied by the broadcasters together with frequency lists of international broadcasts in English, French, German and Spanish - Television - Details of the broadcasters. Now arranged alphabetically by country - Reference - DX Club information, ITU codes and other essential information

The ultimate reference for amateur radio antennas, transmission lines and propagation. Extensively revised, readers will find the latest antenna theory and a wealth of practical, how-to construction projects. CD-ROM included with the complete, fully-searchable text.

This book focuses on the life and work of Nathan Zuntz (1847-1920), a German physiologist, who made significant contributions to high altitude physiology and aviation medicine. He achieved fame for his invention of the Zuntz-Geppert respiratory apparatus in 1886 and the first treadmill (Laufband) in 1889. He also invented an X-ray apparatus to observe cardiac changes during exercise and constructed a climate chamber to study exercise under varying and sometimes extreme climates. \* Focuses on Zuntz's contribution to high altitude physiology and aviation medicine
