Behavioral Evolution** **Oz Talk: Jordan Peterson's Rules to Live By** **Four-billion-years-of-evolution-in-six-minutes | Prasanta Chakrabarty** **What is EVOLUTIONARY PSYCHOLOGY?** **What does EVOLUTIONARY PSYCHOLOGY mean? Why Do Addicted Gamblers Always Lose Money?** **Evolutionary Psychology and Its Critics** **Left-wing Creationism? | Are the critics of evolutionary psychology denying science?** **What is risk intelligence?** **An evolutionary perspective - Intro to Psychology** **Rebecca Watson's Dishonest Representation of Evolutionary Psychology** **Paul Bloom: The Psychology of Everything | Big Think** **Evolutionary Psychology (In Our Time)**

Evolutionary psychologists are beginning to piece together the first truly scientific account of human nature.

How did the mind evolve? How does the human mind differ from the minds of our ancestors, and from the minds of our nearest relatives, the apes? What are the universal features of the human mind, and why are they designed the way they are? If our minds are built by selfish genes, why are we so cooperative? Can the differences between male and female psychology be explained in evolutionary terms? These questions are at the centre of a rapidly growing research programme called evolutionary psychology.

In 1859, Charles Darwin shocked the world by proposing his radical theory of evolution by natural selection. A hundred and fifty years later, Darwin's theory still challenges our most precious beliefs. Introducing Evolution explains 'Darwin's dangerous idea' and shows how it has been developed and confirmed in recent years. Drawing on genetics, ecology and animal behaviour, this book brings Darwin up to date, exploring the profound consequences of the latest scientific discoveries. Introducing Evolution is the ideal modern guide to the most important idea ever to appear in the history of science.

From Darwin to 'Star Trek', Evans offers a lively look at the science of emotions and finds that whether we live in the shadow of Times Square or in the depths of the rain forest, all humans feel disgust, joy, surprise, anger, fear, and distress. 20 halftones.

Introducing Evolutionary Psychology is an introduction to this new field, and offers a fascinating view of the history of the mind, taking you through all of the key figures in the subject's history.

The ideal guide to the most important idea ever to appear in the history of science.

Was love invented by European poets in the Middle Ages or is it part of human nature? Will winning the lottery really make you happy? Is it possible to build robots that have feelings? These are just some of the intriguing questions explored in this guide to the latest thinking about the emotions. Drawing on a wide range of scientific research, from anthropology and psychology to neuroscience and artificial intelligence, Emotion: The Science of Sentiment takes the reader on a fascinating journey into the human heart. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

A new look at the concepts of natural selection and the "selfish gene" draws on the latest research in genetics, ecology, and animal behavior to lend strong support to the theory of evolution. Original.

A synthesis of research and theory, this work chronicles the dawn of a new era in which the adaptability and autonomy of living organisms becomes the model for human made systems and machines. The author combines ideas from the Chaos Theory, cybernetics, current thinking on evolution and research into computerized artificial life with his own experience of on-line culture to show that industrial culture is now obsolete. This book presents the prospects of imminent revolution as Kelly identifies new frontiers of thinking about biological systems that will change the way the natural world is perceived.

Was love invented by European poets in the Middle Ages or is it part of human nature? Will winning the lottery really make you happy? Is it possible to build robots that have feelings? In this Very Short Introduction Dylan Evans explores these and many other intriguing questions in this guide to the latest thinking about the emotions. Drawing on a wide range of scientific research, from anthropology and psychology to neuroscience and artificial intelligence, Evans takes the reader on a fascinating journey into the human heart, discussing the evolution of emotions and their biological basis, the science of happiness, and the role that emotions play in memory and decision making. Greeted by critics as a pop science classic when it was first published in 2001, the book has now been thoroughly revised and updated to incorporate new developments in our understanding of emotions, including new sections addressing the neural basis of empathy and the emotional impact of films. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.
