Talkin Black Talk captures an important moment in the history of language and literacy education and the continuing struggle for equal language rights. Published 50 years after the Brown decision, this volume revisits the difficult and enduring problem of public schools' failure to educate Black children and revises our approaches to language and literacy learning in today's culturally and linguistically diverse classrooms. Bringing together some of the leading scholars in the study of Black Language, culture, and education, this book presents creative, classroom-based, hands-on pedagogical approaches (from Hip Hop Culture to the art of

teaching narrative reading comprehension) within the context of the broader, global concerns that impact schooling (from linguistic emancipation to the case of Mother Tongue Education in South Africa). This landmark work: Presents an interdisciplinary approach on language education, with contributions from leading experts in education, literacy, sociolinguistics, anthropology, and literary studies. Contextualizes the education of marginalized youth within the continuing struggle for equal language rights, and promotes an action agenda for social change. Includes a powerful afterword by Geneva Smitherman — the leading scholar on issues of Black Language and Education.

Newly revised and comprehensive information on aircraft gas turbine powerplants and updated coverage of jet engine technology.

Extensive cross-reference between today's aircraft and engines. Now includes over 500 illustrations, charts and tables. Written by Otis and Vosbury. ISBN# 0-88487-311-0. 514 pages.

This book provides a comprehensive basics-to-advanced course in an aero-thermal science vital to the design of engines for either type of craft. The text classifies engines powering aircraft and single/multi-stage rockets, and derives performance parameters for both from basic aerodynamics and thermodynamics laws. Each type of engine is analyzed for optimum performance goals, and mission-appropriate engines selection is explained. Fundamentals of Aircraft and Rocket Propulsion provides information about and analyses of: thermodynamic cycles of shaft engines (piston, turboprop, turboshaft and propfan); jet engines (pulsejet, pulse detonation

engine, ramjet, scramjet, turbojet and turbofan); chemical and non-chemical rocket engines; conceptual design of modular rocket engines (combustor, nozzle and turbopumps); and conceptual design of different modules of aero-engines in their design and off-design state. Aimed at graduate and final-year undergraduate students, this textbook provides a thorough grounding in the history and classification of both aircraft and rocket engines, important design features of all the engines detailed, and particular consideration of special aircraft such as unmanned aerial and short/vertical takeoff and landing aircraft. End-of-chapter exercises make this a valuable student resource, and the provision of a downloadable solutions manual will be of further benefit for course instructors.

The Dhammapada - A Collection of Verses is an unchanged, high-quality reprint of the original edition of 1881. Hansebooks is editor of the literature on different topic areas such as research and science, travel and expeditions, cooking and nutrition, medicine, and other genres. As a publisher we focus on the preservation of historical literature. Many works of historical writers and scientists are available today as antiques only. Hansebooks newly publishes these books and contributes to the preservation of literature which has become rare and historical knowledge for the future.

Architects and urban planners need to describe cities in the course of their work, be it through maps, diagrams, sketches, computer renderings or models. *Drawing for Urban Design* explores a wide range of ways to represent the city, from freehand sketching to sophisticated computer models. The book provides a practical introduction to these techniques for students while explaining the processes associated with describing and designing urban environments – it is an invaluable visual handbook for representing the contemporary city.

The most comprehensive guide to aircraft powerplants--fully updated for the latest advances. This authoritative textbook contains all the information you need to learn to master the operation and maintenance of aircraft engines and achieve FAA powerplant

certification. The book offers clear explanations of all engine components, mechanics, and technologies. This ninth edition has been thoroughly revised to include the most current and critical topics. Brand-new sections explain the latest engine models, diesel engines, alternative fuels, pressure ratios, and reciprocating and turbofan engines. Hundreds of detailed diagrams and photos illustrate each topic.

“[A] remarkably revealing history.” This well-researched, opinionated account does a fine job of filling a surprisingly empty historical niche. — Publishers Weekly Citizen-in-Chief, *The Second Lives of the American Presidents*, is a smartly researched, surprising, often witty, and always revealing look at former presidents from George Washington to George W. Bush. Authors

Leonard Benardo and Jennifer Weiss offer readers entertaining true stories of the radical turns, provocative rehabilitations, and tragic trajectories of presidential lives after the White House. Washington Post columnist Richard Cohen calls *Citizen-in-Chief*, "an engrossing book, Benardo and Weiss tell a fascinating tale," and he properly states that where our nation's leaders went after leading is often "more interesting than the presidency itself."
