When we refer to files like MP3s, ZIPs, or PDFs, we 're referring to the file type (or file extension) that allows the operating system to identify what type of file it is and what software is needed to open it. This is how Windows or macOS can determine that an MP3 file needs to be opened by your music player, or a PDF by a PDF reader.

How to Change File Type in Windows 10 - Help Desk Geek
