Current safety trends encourage shooters to opt for guns of less power, especially CO₂-powered guns. Several airgun shooters are not required to go through the traditional buying procedures of high-powered pistols and rifles, such as background checks and waiting periods. Plus, companies such as Colt, Smith & Wesson, and Walther manufacture high quality CO₂ products that are visually indistinguishable from their traditional firearms. In this new guide to CO₂-powered pistols and rifles, James E. House offers a comprehensive history of CO₂ guns, dating back to the 1930s, and a discussion of propulsion, pellets, and sights. Beginning shooters are introduced to the market with a complete analysis on performance and accuracy of currently available products. Airgun enthusiasts are reunited with CO₂ classics no longer being manufactured. This
